PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building scalable web applications using the (MongoDB, Express.js, React, Node.js) with server-side rendering via EJS. Proficient in RESTful API design, JWT/session-based authentication, MVC architecture, and clean code practices. Adept at writing maintainable JavaScript (ES6+) code and deploying cloud-hosted applications. Seeking a Software Engineer or Full Stack Developer role to deliver impactful, user-focused solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java

Frontend: HTML5, CSS3, Bootstrap, EJS, DOM Manipulation

Backend: Node.js, Express.js, RESTful APIs, MVC Architecture

Databases: MongoDB, Mongoose

Authentication: Passport.js, JWT, Session-based Auth, OAuth

DevOps & Tools: Git, GitHub, Postman, VS Code, Render, MongoDB Atlas, npm

Methodologies: OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Wanderlust — Full-Stack Airbnb Clone

2024

Node.js · Express.js · MongoDB · EJS · Bootstrap · Passport.js | [Live Demo](#) | [GitHub](#)

- Engineered a full-stack travel listing platform supporting property creation, editing, reviews, and user management for 200+ test listings.
- Implemented secure authentication and role-based authorization using Passport.js and session management, preventing unauthorized access to protected routes.
- Designed scalable MVC architecture with modular routes, controllers, and Mongoose schema validation, improving code maintainability and readability.
- Built 15+ RESTful CRUD API endpoints with centralized error handling and async middleware, achieving 99% uptime in staging.
- Integrated Mapbox API for interactive map-based property discovery, improving user engagement and reducing listing search time.
- Deployed on Render with MongoDB Atlas and secured environment variables; load time under 2 seconds on standard connections.

Advanced To-Do Manager — Task Management App

2023

HTML5 · CSS3 · JavaScript · LocalStorage · FileReader API | [GitHub](#)

- Built a feature-rich task manager using JavaScript with real-time DOM manipulation, supporting 500+

tasks without performance degradation.

- Implemented task prioritization, due dates, file attachments, and dark mode, improving usability in peer testing.
- Used LocalStorage API for persistent cross-session storage, eliminating data loss on page refresh.
- Added real-time search and filter functionality, significantly reducing average task lookup time.

EDUCATION

Lovely Professional University

Master of Computer Applications (MCA) | Punjab, India

2026 – 2028 (*Pursuing*)

Graphic Era Deemed to be University

Bachelor of Computer Applications (BCA) | Dehradun, Uttarakhand

2022 – 2025

CERTIFICATIONS

Generative AI — Simplilearn | 2024 | [View Certificate](#)

Introduction to Prompt Engineering with GitHub Copilot — Simplilearn | 2024 | [View Certificate](#)

ACHIEVEMENTS & ACTIVITIES

-
- **Event Coordinator, Tech Club (2023)** — Organized 3 technical workshops attended by 100+ students, coordinating speakers, logistics, and post-event feedback collection.
 - Active contributor on GitHub with consistent commit history across personal and open-source projects.
